

Planning Your Pasture

What to Include

large corner gates

highly visible fencing

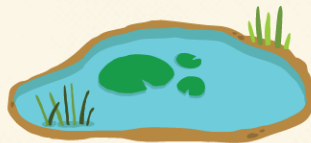

clean water access

What to Avoid

steep hills

bodies of water

dense woods

poisonous plants

Size & Stocking Rates

Rectangular pastures with 2 acres per 1,000 lb horse are best.

Seeding

Plant 6-12 months before pasture use. Use the following schedule for seeding in Nebraska:

Cool-Season Grasses	Warm-Season Grasses
August 1 - September 15 March 1 - April 30	April 1 - May 15 November 15 - April 1
